Famagu'on Hånom Guahan

My helpful habits to Protect Guam's Fresh Water Prutehi i Hanom Freskon Guahan

- If I wouldn't drink it, I won't dump

it. Hazardous liquids can get into our rivers, lakes, and the underground aquifer, so I don't dump.

- I turn off the tap! I won't leave water running when I don't need it in the sink or shower.

- I help stop leaks. I'll check for leaks from all faucets and toilets at my home and show them to an adult.

- I'm a volunteer! I'll help with recycling and clean up projects at school, in the village, and island wide.

My PLEDGE

I recognize ...

that Guam's supply of fresh, drinkable water is an important natural resource that is necessary for life on our island.

I promise...

to practice helpful habits that guard against polluting and wasting Guam's fresh water.

I care about protecting ...
